

Gideon Maasland

Director, and Architect, Gideon Maasland (NL), joined MVRDV in 2016. With extensive experience acquired at several high profile Dutch offices, Maasland leads MVRDV's Studio 8, which is responsible for large-scale, complex buildings in the Netherlands and abroad. He leads the development, and construction of Valley, a 75,000 m² mixed-use building in Amsterdam, as well as the construction of a 61.800 m² residential tower project in the Hague, and the transformation of Jaarbeurs in Utrecht, a trade fair of 170.000m². Besides this, Maasland is working on several projects in Poland, and the UK. Other exceptional projects include the Glass Farm in Schijndel, The Crystal Houses in Amsterdam, and the Balancing Barn in Suffolk, England.

"I love to work on buildings that make a difference to the people using them or living close to them. At first glance, you might think these projects will never happen, because they are too difficult, too expensive, or not technically possible, but with the help of a large team of experts, and dedication to relationship management, anything is possible. There are no good projects without good clients." - Maasland

Profession

Director
Architect
