The solution
for technical know-how

» WICTIP

TECHNICAL INFORMATION PLATFORM

» Entire product documentation range at a glance

WICTIP enables architects, planners and fabricators to have quick and easy access to the entire WICONA product documentation, which is necessary for planning right through to processing the WICONA system solutions.

Product ranges, workshop manuals, fitting installation plans, test certificates, planning information, certificates, documents on the CE marking, sectional CAD drawings and many more documents have been perfectly prepared in WICTIP.

The proven platform has now be refined – and the result is convincing!

Stronger. Faster. Smarter.

Intuitive design

The intuitive design immediately catches the eye. All the technical documentation for a product series can be downloaded in just a few clicks.

Simple download basket

Just collect and download! All technical documents, certificates, drawings etc. can be selected and then quickly and easily downloaded as an entire packet using the download basket.

Powerful search function

One of the most important innovations is the powerful search function using keywords. With the option to set filters, searches are even more targeted and the results can be further refined.

Flipping Book instead of pdf reader

In the new WICTIP, the document required is opened in Flipping Book. The benefit of this is that search terms previously entered in the WICTIP search are displayed once the required document is opened in Flipping Book: highlighted in colour in the text as well as in a navigation bar. By using this navigation bar, you can go directly to the corresponding page of the relevant document.

Smart news function

The new news function is smart - in the truest sense of the word. Users are informed as soon as new technical documents or document updates are available. Architects, planners and fabricators are thus guaranteed of being kept up-to-date.

Responsive design

Thanks to the specially programmed responsive design the display independently adjusts to the appropriate format for the user's device.

Helpful tools

In addition to the technical documentation, WICTIP offers helpful tools for calculating technical data, e.g. for calculating static values or U_w values, a comprehensive library of tender texts and WICONA 3D BIM objects.

WICTIP App

The WICTIP App for mobile devices is the perfect complement to the WICTIP desktop version – available in the App Store and Google Play.

Not yet got a WICTIP account?
Register now and discover the entire product documentation range – updated every day!
